

Application for Membership in the Graduate Program in Neuroscience

The Graduate Program in Neuroscience (GPN) is a multidisciplinary program administered under the Faculty of Medicine and the Djavad Mowafaghian Centre for Brain Health. The objective of the Program is to provide a comprehensive education in neuroscience and an intensive training program in at least one area of research. The graduate program has a diverse range of research specialties and accepts students from a diverse range of educational backgrounds. In order to supervise a student in the Graduate Program, faculty must become a member of the program and be approved by the Faculty of Graduate and Postdoctoral Studies.

Applications for membership into the GPN are considered by the Program's Executive Advisory Committee; criteria for acceptance include academic qualifications to the level of Ph.D. or equivalent, research background, research accomplishments and ongoing research funding.

Expectations of Faculty

In addition to student supervision, the GPN requires that faculty members participate in regular Program activities. These include contributing to the delivery of the Program's core courses (NRSC 500 and 501) and to participate in the various scholarly activities such as chairing student defense exams, serving on student program advisory committees, adjudicating student admissions and awards, etc. Only in this way is the Program able to take advantage of the expertise of researchers from many different fields and disciplines with the combined interest Neuroscience.

To apply for faculty membership, please forward your C.V. and a covering letter that details the type and term of faculty appointment to:
